new_2_srbox – srbox
A plug-in for using the serial response box.

Dummy mode (use keyboard instead)
 Ignore buttons that are already pressed

Device name:

Correct response:

Allowed responses:

Timeout:

Turn on lights:

Note: If there are multiple srbox items in the experiment, the first srbox item determines the device name and whether dummy mode is enabled

Apply

```

1 set timeout infinite
2 set require_state_change no
3 set dev autodetect
4 set description "A plug-in for using the serial response box."
5 set allowed_responses "1;2"
6 set _dummy no
7

```

Console

Python (1)

```
